

Electromagnetic metering pumps

Electromagnetic metering pumps
with 100% watertight construction

The EK series electromagnetic metering pumps are constructed to be perfectly watertight.

The EK series is the world's first plastic resin electromagnetic metering pumps that are capable of being used outdoors.

They can be used widely in various facilities and plants for water treatment, surface treatment and so forth.

Electromagnetic metering pumps with 100% watertight construction

The EK series electromagnetic metering pumps are constructed to be perfectly watertight. Conventional electromagnetic pumps are thought to be vulnerable to exposure to external liquids, which means that they are unsuitable for outdoor use. To address this weak point, we have done our best to make the controller unit and the drive unit fully watertight and moisture proof. As a result, the EK series is the world's first plastic resin electromagnetic metering pumps that are capable of being used outdoors. They can be used widely in various facilities and plants for water treatment, surface treatment and so forth.

Waterproof structure (equivalent to IP67)

By integrating a one-piece pump body, sealing portions are reduced in number to prevent liquids from entering due to sealing defects. A rubber gasket is provided between the pump head and the bracket to prevent water from entering through the periphery of the pump head.

To keep the controller unit watertight, a plastic cover with gasket is provided as standard equipment.

The adoption of membrane switches for the controller panel is another measure for the prevention of liquid penetration.

Moistureproof structure

The electronic parts and printed board have been molded with resin.

This prevents dew condensation and short-circuiting caused by atmospheric gas.

High resolution

For discharge flow adjustment, a dual control system which controls the length of stroke and the number of strokes is employed. Since stroke by stroke adjustment is possible, the discharge rate can be controlled in a wide range from a minimal flow rate to a maximum discharge.

Controller

The controller has a CPU. Both the stop function and the external function are included as standard equipment. As the display for the number of strokes, a high-temperature resistant LCD is employed to allow long-term exposure to the direct rays of the sun.

EK-B11PC

EK-B11VC

High-tech combination of pump technology and electronics technology

SUS 316 type

Pump unit

Pump head

Four types, PVC, GFRPP, PVDF and Stainless steel 316 are available.

PVDF type

GFRPP type

PVC type

Diaphragm

A flat diaphragm with less dead volume. Made of EPDM covered by fluororesin, it is highly corrosion-resistant and remarkably durable.

Valve

A two-stage valve system, which has high checking ability, is used. There are two types of valve assemblies, i.e., for acid liquid and for alkaline liquid.

Air vent valve

The smaller flow rate types (to the EK-21) have air vent valves as standard equipment. Air in the pump chamber can be easily released simply by turning knob.
Note: For SUS316 type, airvent valve is available for all pump sizes.

Controller unit

Controller

A CPU is mounted to raise the resolution and promote functional diversity.

Control panel

An LCD suitable for use under high temperature is also weather-tight and easy for the operator to read. To protect the controller portion from external liquids, membrane switches are used.

Stroke length adjusting dial

The large adjusting dial is easy to operate. Dual control of the number of strokes as well as the length of stroke allows a wide range of discharge adjustment.

Controller cover

All the models have controller covers as standard equipment.

Connector

Sealability has been improved by the adoption of an IP68 connector.

Drive unit

Solenoid

A coil and a thermal protector, insert-molded by resin, ensure insulation. For the convenience in recycling, the resin portion and the metal portion are constructed to be easily separable.

Pump body

The body is in a PPE case; this material offers strong protection against ultraviolet rays and has high chemical resistance.

All of the assembled portions are attached with rubber seals; its water-tightness is equivalent to IP67.

	PC, PH	mm	4x6, 4x9			8x13, 9x12		4x6, 4x9		8x13, 9x12	
	TC, SH	mm	4x6	—	4x6	—	—	4x6	10x12		
Thread connection		SH	Rc1/4"	—	Rc1/4"	—	—	Rc1/4"			
Mass		kg	2.8				3.7				

Note 1: The maximum discharges are values with clear water and under maximum discharge pressures. Under lower discharge pressures, larger amounts than the above are discharged.

Note 2: To prevent overfeeding, discharge pressure should be 0.12 MPa or higher. (For B31 and C36: 0.05 MPa or higher.) If these levels are not reached, make sure to use a check valve (optional item).

Note 3: Above mass are PVC, GFRPP & PVDF type. Please contact Iwaki for SUS316 type.

Operating Conditions

- Liquid temperature range VC/VH : 0 to 40°C, PC/PH/TC/SH : 0 to 60°C (Without dew condensation.)
- Ambient temperature range VC/VH : 0 to 45°C, PC/PH/TC/SH : 0 to 50°C

Specifications of controller

Operational function	Function	MANUAL (Manual operation)
		EXT (Operation by external signals)
		STOP (Operation to be stopped by external signals)
	Switching	Selection by operating keys (UP and DOWN keys) START / STOP key (Membrane)
Control function	Setting	<ul style="list-style-type: none"> MANUAL The number of strokes between 1 and 360 spm EXTERNAL Digital input operation 1 : 1 (No pulse to be stored)
	Stop	Stop contact input stops pump operation.
	Highest SPM	360 spm.
Input	Pulse	No-voltage contact or open collector
	Stop	Level sensor : No-voltage contact or open collector
Connection		Terminal connector connection (Original type)

Operating Conditions

- Ambient temperature range : 0 to 50°C
- Ambient humidity range : 35 to 95% RH (Without dew condensation inside the controller.)

Accessories

Check valve CA /CB / CS

This has the function of a nonreturn valve and prevents siphon and overfeed.

CA : Available in PVC and CFRPP.

CB : In-line type to be connected in the middle of a hose; made of PVC or CFRPP.

CS : Made of stainless steel for SH type.

Specifications

Siphon preventing valve BVC

Made of PVC or GFRPP consisting of non-metallic parts.

Specifications

Model	Connection		Set pressure MPa	Material			Applicable pump
	Inlet mm	Outlet		Body	Spring	O-ring	
Note BVC-1 □□	4x6 6x8 9x12	R3/8 or R1/2	0.2 or 0.05	PVC	-	FKM or EPDM	All models

Note : Different models are available. Please contact for particulars.

Air vent valve AV

For EK-B31, C31 and C36.

Specifications

Model	Tube connection	Material	Applicable pump
AV-LVC	8x13mm 9x12mm	PVC, FKM	EK-B31, C31, C36-VC
AV-LVH		PVC, EPDM	EK-B31, C31, C36-VH
AV-LPC		GFRPP, FKM	EK-B31, C31, C36-PC
AV-LPH		GFRPP, EPDM	EK-B31, C31, C36-PH

Multi-function valve MFV

This valve has the multi-function of air vent, pressure release inside pipe, and back pressure valve.

Specifications

Model	Tube connection	Set pressure	Material	Applicable pump
MFV-SVC	4x6mm 6x8mm 4x9mm	0.2 ± 0.13 / -0.12 MPa	PVC / FKM / PTFE	EK-B11, B16, B21, C16, C21
MFV-SVH			PVC / EPDM / PTFE	
MFV-SPC			GFRPP / FKM / PTFE	
MFV-SPH			GFRPP / EPDM / PTFE	

Foot valve FS / FSP

Foot valve with a strainer.
Made of PVC or GFRPP.

Specifications

Model	Tube connection	Material	Applicable pump
FSV	4x6mm	PVC / FKM / Alumina ceramic	All models
FSE	6x8mm	PVC / EPDM / HastelloyC276	
FSPV	8x13mm	GFRPP / FKM / Alumina ceramic	
FSPE	9x12mm	GFRPP / EPDM / HastelloyC276	

Chemical tank CT

Light and strong polyethylene round tank.
25L, 50L, and 100L models are available.

CT-100N

CT-50A

CT-25A

Chemical tank CT-U120N

Square polyethylene tank with a pump located below.
This tank can be used safely, as it is free from gas-lock problems.

Capacity : 110L

Dimensions in mm

Note: Above dimensions are PVC, GFRPP and PVDF type. Please contact to Iwaki for dimensions of SUS316 type.
