

# Durco T4E Lined Plug Valves Fluoropolymer Lined Valves

**Experience In Motion** 

## **History**

Flowserve Durco T4E valves have been designed and developed with the latest technology and are the most preferred fluoropolymer lined valves in the global chemical industries. Durco T4E valves provide maximum

corrosion resistance and the elimination of product contamination at a reasonable cost.

### Available in a Broad Size Range and

- T4E1 ASME Class 150 is available in sizes ½" through 12"
- T4E3 ASME Class 300 is available in sizes ½" through 10"

## **Extended Pressure Classes**

- T4E1 rated 180 psi @ 400 °F, 250 psi @ 100 °F
- T4E3 rated 320 psi @ 400 °F, 740 psi @ 100 °F

*Available with pneumatic or electric actuators for On-Off or modulating control applications. All T4E valve series are rated to 30 inches Hg vacuum at ambient temperature.* 

### **Features**

**Double-D plug stem** accepts most standard actuation equipment

Dynamic, Self-adjusting, Self-Energizing PFA Reverse Diaphragm

Standard Lockable Wrenches Allows valve to be locking in open or closed position

> Inline adjustment Stops thru-line leakage

ISO 5211 Mounting Pad Universal flange for easy actuation mounting

> Grounding spring To avoid build-up of static electricity

**Solid Encapsulated PFA Molded Plug** All plug inserts have anchor holes to ensure a strong adhesion of the plug PFA liner material even under extreme cycling conditions

**Cast Slots in Plug Area to Lock Liner** Offers a strong and reliable fit of the body liner even under extreme service conditions and cycling actions

T-Slots in Critical Areas to Lock Liner Against Body Wall Advantage will be a tight and

perfect fit of the liner and an additional support during vacuum service

#### High Quality PFA Liner

Protects the body and forms the flange gasket. The PFA liner is resistant against a wide variation of chemical products Anti-Rotation Lugs Help to eliminate stress on fasteners during actuation

> Raised Lip Prevents cold flow outward

Large Ports Offer good Cv values. Reduced frictional losses & pressure drop

## **Additional Benefits**

**FLOWSER** 

Benefits that give you the extra security which you will appreciate when using the T4E1 and T4E3 valves

#### **Body Liner**

- A perfectly fixed PFA body liner is well anchored to the body by means of machined and cast T-slots. The plug substrate has anchor holes to ensure that the PFA liner material is securely attached to the plug.
- Due to the selected mode to lock the liner to the valve body and plug, the T4E valve series is very suitable for extreme service conditions including vacuum applications at elevated temperatures.
- The PFA body liner covers all wetted surfaces in the body.
- Due to it's large sealing surface a tight shut-off is assured.
- In addition to the large seating area the valve is fully bi-directional and the seal is totally independent of line pressure.

#### In-Line Adjustment

- No disassembly required to restore seating; plug can be reseated with a quick and easy in-line adjustment.
- An open end wrench and a few seconds are the extent of your maintenance requirements.

There are:

- No seats to replace
- No lengthy production disruption
- No piping disconnection
- No complicated, time-consuming maintenance procedures
- No hazards to personnel

## Secure Sealing

- A dynamic self-adjusting, self energized reverse lip PFA diaphragm seal prevents stem leakage.
- If line pressure forces liquid to the stem seal area, the selfenergizing reverse lip PFA diaphragm will be forced against the stem to prevent external leakage.
- A sealing surface as much as 10x greater than other lined valves assures drop tight shut-off.
- In addition to the large sealing area, sealing is both upstream and downstream and is totally independent of line pressure.

#### Weepholes

#### Weepholes for early leakage detection

Durco T4E valves are supplied with three weepholes that are plugged with screws. The customer has the option to remove the screws. In so doing he is able to detect any leakage of process fluid through the liner and to take appropriate action.

### **Durco T4E Automated Valves**

Choose from a complete line of Flowserve Automax Automation Equipment for precise proportioning and On-Off control....or we'll build a control package to your specification.

Durco T4E valves are readily adaptable for automatic operation because the torque is relatively constant and lubrication is not required.

Flowserve Automax, a specialist in complete automation systems, produces a broad line of rack and pinion, heavy-duty, electric and linear actuators. In addition, a comprehensive line of engineered special control circuits, solenoid valves, limit switches, positioners and actuator mounting kits is offered.

#### Software Capability

Flowserve offers a state-of-the-art range of software to help in sizing valves and actuation and creating drawings.

#### Modulating Control

V-port T4E valves are available in 1" through 4" sizes with Cv values of 1 through 187.

Standard port T4E valves are available in ½" through 12" sizes with Cv values from 15 through 3200.

#### **Control Plugs**

Size	CV	Plug Type

## **Material Specification**

## T4E1 and T4E3 (1/2" - 6")

No.	Designation	Material
1	Body T4E1	Ductile cast iron - EN-JS1049/ASTM A395, PFA lined
	Body T4E3	Carbon steel ASTM A216 grade WCB, PFA lined
2	Plug	Ductile cast iron - EN-JS1049/ASTM A395, PFA lined
3	Diaphragm	PFA
4*	Metal diaphragm	Stainless steel - 302
5	Thrust gland	Machining steel - 1.0718
6	Grounding spring	Stainless steel - 302
7	Top cap T4E1	Ductile cast iron - EN-JS1049/ASTM A395
	Top cap T4E3	Carbon steel ASTM A995 Gr CD4MCuN
8	Adjuster bolt	ASTM A193 grade B7YC
9	Top cap bolt	ASTM A193 grade B7YC
10	Stop	Stainless steel ASTM A351/A744 grade CF-8M (316 SS)
11	Stop fastener	Stainless steel 1.4301
12	Stop collar	Carbon steel, protective plated
13	Stop collar retainer	Stainless steel - 302
14	Wrench	Ductile cast iron - EN-JS1082/ASTM A536
15	Washer	Stainless steel - 1.4301
16	Hexagon bolt	Stainless steel - 1.4301
*Opti	onal	9

### T4E1 (8" - 12") T4E3 (8" - 10")

No.	Designation	Material
1	Body T4E1	Ductile cast iron - EN-JS1049/ASTM A395*, PFA lined
	Body T4E3	Carbon steel ASTM A216 grade WCB, PFA lined
2	Plug	Ductile cast iron - EN-JS1049/ASTM A395
3	Top cap T4E1	Ductile cast iron - EN-JS1049/ASTM A395
	Top cap T4E3	Carbon steel ASTM A995 grade CD4MCuN
4	Diaphragm	PFA
5	Thrust gland	Dupex stainless steel ASTM A995 Gr CD4MCuN
6	Adjuster	Dupex stainless steel ASTM A995 Gr CD4MCuN

#### Note;

All dimensions are approximate and for illustration purposes only. For exact dimensions consult certified dimensional prints

Valve 8"-12' are shown with double D stems which are standard. However spline shafts are also available for these sizes as an option.

All weights include either wrench or gear operator

Face-to-face dimensions comply to ANSI B16.10 and flange connections comply to ANSI B16.5

#### Actuator Mounting Dimensions

**Note:** All dimensions are approximate and for illustration purposes only. For exact dimensions consult certified dimensional prints.

## To Access Literature On-line -

More information about FLOWSERVE products can be obtained on-line. It's easy to find... it's free... and you do not need a password.

### ► Do This:

O to www.flowserve.com

The most recent version of each product bulletin will be available on this site.

Once you have the PDF, you can: • read it

- print it
- download it
- even e-mail it

### **Other Useful Information**

In addition to lined plug valves, lined butterfly valves (Document number DVENTB0020) and lined ball valves, check valves and sight glasses (Document number ATENTB0010) are also available.

Finally, a wide variety of metallic and lined rotary valves and actuation equipment is summarized in the Document number DVENBR0001.

To obtain any of these brochures, follow the simple steps on the left of this page and enter the Document number in Step 3.

## **Ordering Preprinted Literature**

Customers, please contact your Flowserve sales representative to get hard copy of a brochure. Flowserve representatives and distributors can go to www.flowserve.com and click on the "View Literature" link then click on "Log-in to order hard copy literature" and follow the prompts.

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can (and often does) provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Maintenance (IOM) instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
